mbined by user's mouse operation do not make an effective (or valid) combination, the error message is displayed on the display screen shown in FIG. 5.

Detailed Description Text - DETX (80):

In FIG. 8, numeral 501 denotes an error message dialog box which is displayed when the combination of the icons is not effective.

Detailed Description Text - DETX (82):

FIG. 9 is a flow chart showing an example of a first data processing procedure in the data processing apparatus according to the present invention. The first data processing procedure corresponds to a combination function processing procedure according to system structure display processing.

Detailed Description Text - DETX (84):

Next, in a step S204, when execution of each function is instructed, it is judged whether or not such an instruction is effective. For example, on the screen shown in FIG. 5, when the scanner icon 302d is dragged to and dropped on the printer icon 302n by using the mouse to execute the copying function, it is judged whether or not the combination of the scanner and the printer is effective.

Detailed Description Text - DETX (86):

Conversely, if judged in the step S204 that the combination is effective, the flow advances to a step S206 to display a corresponding-function window. In the present embodiment, the setting screen for the copying function shown in FIG. 7 is displayed on the CRT 16.
